-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 25-66 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Giersberg in view of Hempelmann of record for reasons of record.

Double Patenting

Claims 25-66 stands rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,676,821 in view of Giersberg of record for reasons of record.

Response to Arguments

Applicant's arguments filed 10/2/06 have been fully considered but they are not persuasive.

Applicants argue that the Giersberg patent and the Hempelmann patents teach the metal for oxides formed come from the anode and not from dissolved metal as required in the present application. The reference further discloses the membrane but not to block halogens.

Art Unit: 1753

The fact that the metal is dissolved out of the anode or metal is not relevant to the claims. In any event, the dissolution of the anode to form the metal oxides would read on the dissolution of metals.

Further the membrane of the Giersberg patent is said to be cation permeable and would therefore preclude the permeability of the halogen ions. It is noted that the ceramic membrane disclosed by Giersberg would include the glass frit claimed, since such terms are used interchangeably in the art of membrane electrolysis.

Accordingly, the claims stand rejected.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
